Liaison statement from T1 to TSG-T, TSG-RAN 1, TSG-RAN 4

Assumptions for time schedule for FDD/TDD radio interface conformance requirements

In order to have the Radio interface conformance test requirements (Measurements Procedures, Logical Test interfaces) stabilized by the end of 1999, we have to assume that the core specifications (S4.01A and S4.03) are stabilized in substance by September 1999.

Actual individual requirements/parameters are expected to be stabilized by October 1999. Last editorial and other smaller changes must be released by December 2nd.

A source of concern is the TDD specifications.

Lack of contributing resources makes the TDD time schedule especially critical. T1 urgently invites contributions to assure progress in the TDD area.
