Work Item Submission Form

| | | | | | |
|---|-----------------|---|---|------------------------------|----------------------|
| Work Area / Item: | | Continuous Evolution of Synchronisation Protocol | | | |
| Affects: | UE/MS: X | CN: | UTRAN: | Compatibility Issues: | Yes: No: |
| Expected Completion Date: | | June 2001 | | | |
| Services impacted: | | Data Synchronisation | | | |
| Specifications affected: | | 3G TR 27.103 | | | |
| Tasks within work which are not complete: | | | An update to the 27.103 data synchronisation specification to reflect a new technology. | | |
| Consequences if not included in Release 4: | | | The data synchronisation technology environment has changed significantly since the original drafting of 27.103 and 3GPP needs to keep up with this changing environment. To ignore such significant changes ensures that 3GPP specifications will be obsolete before they reach products. Newer and more comprehensive data types will not be available. | | |
| Accepted by TSG# | | for late inclusion in Release 4: | | | |
