TSG-T has discussed the LS from SA4 (Tdoc S4-010389 , TP-010144) concerning codec type UMTS_AMR2.
TSG-T1 and T3 had no comments concerning this LS.
In principle TSG T had no objection to the inclusion of codec type UMTS_AMR2.
However, the T2 Chairman (Ian Harris) commented that the MMS Stage2 Specification 23.140 has specific references to codec types. Ian Harris also commented that he has received some e-mail correspondence proposing that there should be no specific reference to codec types in 23.140 but that the codec types should be referred out to SA4 controlled documents.
The SA4 LS (S4-010389) will be sent to TSG T2 for discussion at their next T2 meeting in Edinburgh in September and T2 will advise SA4 of the outcome of its discussion.
