Joint Meetings Held since TSG-T#18

- **T2 SWG3/SA1 - a number of outstanding T2/SA1 matters**
 - 22nd January 2003
 - Co-located T2/SA1 San Francisco
 - Outcome is contained in an SA1 report
 - One issue of interest to TSG T is a potential harmonisation matter between 3GPP, 3GPP2 and the role of OMA
- **T2 SWG3 /T3 - Storage of MMS parameters on the USIM example**
 - 12th February 2003
 - Co-located with TSG T3 Lisbon
 - Outcome
 - T3 to produce CR to T3 controlled specifications
 - T2 have no need to produce a CR to 23.140

Key issues at T2#20

- **52 delegates attending, approx 170 tdocs processed by TSG T2#20, split of documents between SWG3 / SWG2 roughly equal.**
- **SWG1 did not meet but SWG1 chairman Lars Brenk, as rapporteur, offered to work on editorial improvements to MExE Stage 2. There is no input document to this TSG T**
- **GUP: Insufficient time to progress this work to justify a planned joint meeting with SA5. A T2 SWG2 meeting to further this work in February was cancelled due to its closeness to TSG T2#20**
- **UEM: There is insufficient interest in T2 to further this work. This situation is unchanged from T2#19. There has been no interest conveyed to T2 from TSG T after this problem of lack of support was raised at TSG T#18. TSG T guidance is sought regarding this work item**

Key issues at T2#20 continued

- **MMS parameter storage on the SIM/USIM: T2 were undecided whether a much needed example should be in MMS Stage 2 23.140 (under T2's control) or 31.102 (under T3's control) . T2 gave a mandate to a joint T2/T3 meeting to resolve this.**
- **T2 continues to lose some of its key delegates at the rate of about 3 per T2 meeting over the past 3 T2 meetings - some of whom are now going to attend OMA instead of 3GPP. This may be a growing problem for the ongoing effectiveness of T2 but is probably a much wider issue than just concerns for T2**
- **MMS WID: T2 took a show of hands of companies who intend to further the work for each of the items in the WID. Some items had no supporting companies. A document has been produced for discussion at TSG T in TP-030063 to investigate potential support for these items.**

SWG1 (MExE) Summary

- No input documents

A GLOBAL INITIATIVE

SWG2 (UE Interfaces and Capabilities) Summary

- **17CR's (1 R98, 4 R99, 4 R4, 4 R5, 4 R6) and 2 LS's agreed.**
 - All CR's relate to AT commands affecting several releases
- **Generic User Profile:**
 - Progress ongoing but no input documents to this TSG T. Specs expected by September for information
 - Proposed structure of 23.241 GUP Stage 2 Data description framework agreed
 - Several contributions on content (use cases, information model and others) incorporated into the draft spec
 - LS to SA2 cc TSG-T in TP-030009 reports about the GUP progress in more detail
- **User Equipment Management**
 - No progress due to insufficient support

SWG3 Summary (MMS)

- **17 CR's 23.140 (4 REL-4, 6 REL-5, 7 REL- 6) 8 LS's agreed**
- **MMS parameter storage on the SIM/USIM behaviour:**
 - **A CR for REL-4 has now been produced following feedback from SA/SA1 on an outstanding matter from the T2#19 reported to TSG T#18. A Rel-5 CR was agreed at TSG T#18**
- **MMS parameter storage on the SIM/USIM example:**
 - **Joint meeting arranged with T3 concerning whether an important example should be in 23.140 or 31.102**
- **Currently discussions are ongoing on providing MM7 message related fields on MM4, addition of MMS relay identifier, extension of delivery report over MM4, and third party pays which may lead to CRs in the near future**

SWG3 Summary (EMS)

- There were no EMS contributions
