### 1. Overall Description:

An LS from SA2 (T2-030391, S2-0302634) requested T2 to provide the support in MMS for a SIP URL format to allow MMS to be the deferred mode for IMS Messaging as part of Release 6.

T2 wishes to inform SA2 that T2 has been unable to complete this work in the REL-6 time frame because CN1 and SA2 recently expressed concerns on the architectural impacts of the approach envisaged by T2. Continuation of this work could be carried over to REL7 but this is not an automatic process because incomplete items on the existing WID will be cancelled at T#26. Continuation will therefore require a new WID from supporting companies.

The current situation in T2 is that there is no intention to create such a WID in T2.

### 2. Actions:

**To** SA2  
**ACTION:** None

### 3. Date of next T2 Meetings:

<b>T2#28</b>	8 - 10 Feb 2005	Sophia Antipolis, France
