Proposed change affects: | UICC apps # ME Radio Access Network Core Network

Title:	# Correction of non-specific references to SCP documents		
Source:	# Rapporteur		
Work item code:	# TEI	Date:	# 29/11/04
Category:	# F	Release:	# Rel-4
	Use <u>one</u> of the following categories:		Use <u>one</u> of the following releases:
	F (correction)	2	(GSM Phase 2)
	A (corresponds to a correction in an earlier release)	R96	(Release 1996)
	B (addition of feature),	R97	(Release 1997)
	C (functional modification of feature)	R98	(Release 1998)
	D (editorial modification)	R99	(Release 1999)
	Detailed explanations of the above categories can be found in 3GPP TR 21.900 .		Rel-4 (Release 4)
			Rel-5 (Release 5)
			Rel-6 (Release 6)

Reason for change:	# It was decided during T#25 to indicate in T3 specifications the specific release of the referred to SCP specification. Rapporteurs were tasked to propose the necessary corrections.
Summary of change:	# Indication of the Release of the referred to SCP specification.
Consequences if not approved:	# The non specific reference implies that a Rel-4 specification would reference the latest release which implies that features of the latest release of the referenced specification would apply. The specification would be considered as non frozen as long as any referenced specification is updated with a new release.

The following documents contain provisions which, through reference in this text, constitute provisions of the present document.

- References are either specific (identified by date of publication, edition number, version number, etc.) or non-specific.
- For a specific reference, subsequent revisions do not apply.
- For a non-specific reference, the latest version applies. In the case of a reference to a 3GPP document (including a GSM document), a non-specific reference implicitly refers to the latest version of that document *in the same Release as the present document*.
