Nomination of Mr. Yannick Lair as 3GPP TSG CT WG1 Vice Chairman candidate

Dear Ms. Kooistra and Mr. Firmin,

On behalf of NEC, I am pleased to nominate Mr. Yannick Lair as a candidate for the Vice Chairman position of 3GPP TSG CT WG1. Yannick represents Individual Member NEC Technologies (UK) LTD, ETSI.

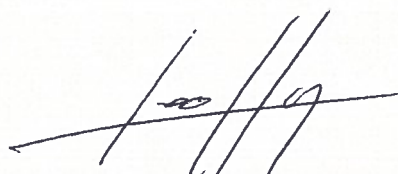

Yannick has 14 years' experience in the mobile communications industry. He has held different positions including software engineer, systems engineer, standardization engineer and standardization project manager. His main technical expertise is on Non-Access Stratum and mobile radio layer 3 protocols for GSM, GPRS, UMTS and EPS.

Yannick received an Engineering degree from the "Ecole Nationale Supérieure des Télécommunications de Bretagne", Brest, France, in 1997. After three years working within Alcatel, he joined NEC in 2000, in the newly founded French Mobile Development Centre, as software engineer working on multi-mode GSM / GPRS / UMTS terminal platforms.

Since July 2006, Yannick has been a regular and active participant of 3GPP TSG CT WG1 and he has been leading NEC's delegation. He is one of the current Vice Chairmen since August 2009. He has been contributing mainly to the specification of SAE and CS Fallback, acting, for the latter, as Rapporteur for the Work Item and 3GPP TS 29.118.

NEC will provide full support to Yannick, if re-elected, in his activities as Vice Chairman, as part of NEC's continued commitment to the success of 3GPP.

Yours sincerely,

Lionel Poisson
Managing Director
NEC Technologies (UK) Ltd.
