Subject: Support for 3GPP-SA3 Vice Chairman candidate

Dear Mrs. Kooistra and Mr. Cano Soveri,

Gemalto, as a specialist of digital security and Individual Member of 3GPP via the ETSI Organisational Partner, has always considered 3GPP-SA3 as an essential working group. We would like to continue to demonstrate our full commitment by proposing Mrs. Mireille Pauliac as candidate for the position of vice chairman.

Mireille is an accomplished expert in security systems and has contributed for years in the 3GPP-SA3 and other standardization bodies. She gained a deep insight of the subjects treated by the group, the specifications contents and structure as well as the working procedures.

Gemalto is committed to provide Mireille with all the necessary support to fulfil her duties as vice chairman of 3GPP-SA3.

Yours Sincerely,

A handwritten signature in black ink, appearing to read "Bruno", with a long, sweeping horizontal stroke extending to the right.

Bruno Basquin

Resume of Mireille Pauliac

Mireille Pauliac is security expert at Gemalto and belongs to the Standardization and Technology Department. After an engineering degree in computer science from "Ecole Supérieure d'Ingénieurs en Génie Electrique" (ESIGELEC) in France, she started working in Gemplus (now Gemalto) in 1996 as smart operating system developer and then joined the security experts team. She has participated in numerous projects in banking and telecommunications sections to design and review the security of protocols, and led security evaluations for ITSEC and Common Criteria certifications. She has contributed to telecommunications standardization with active participation in security of 3GPP (for 12 years), TISPAN, ETSI M2M and oneM2M. Prior, she was involved in Electronic Signature standardization in CEN and ETSI ESI.
